2017

International Congress on Quality in Laboratory Medicine

8-9 th of February 2018 at the Expo and Convention Centre

Helsinki, Finland

Congress draws annually approximately 1,000 visitors.

XXXVI Nordic Congress of Clinical Chemistry

SKKY

EFLM
EUROPEAN FEDERATION OF CLINICAL CHEMISTRY
AND LABORATORY MEDICINE

12-15 June 2018 at the Finlandia Hall

Helsinki, Finland

XXXVI Nordic Congress of Clinical Chemistry

Sponsors

Abbott, Roche

Exhibitors

AH diagnostics

Mediq Suomi Oy

Medix Biochemica

Merck Life Science Oy

Pamark Oy

SYNLAB Finland Oy

Sysmex Nordic ApS

T&O LabSystems GmbH & Co. KG,

Thermo Fisher Scientific

Timedico A/S

Following symposia will be arranged

- Pre-analytical quality
- Post-analytical quality
- Update on coagulation laboratory
- Newborn screening
- Impact of laboratory tests
- Astrup Prize symposium
- Laboratory and the fatty liver
- Diabetes and the laboratory
- Cardiovascular laboratory tests
- Basics of genetic and epigenetic testing
- Application of genomic data into healthcare and clinical practice
- Molecular hematology and clinical laboratory
- New biomarkers
- IT security in the laboratory

12-15 June 2018 at the Finlandia Hall

Helsinki, Finland

Santorini Conference "Systems medicine and personalised health & therapy" - "The odyssey from hope to practice"

30 September to 3 October 2018

Thira Santoirini, Greece

The attendance reached over 140 participants from 33 different countries.

Santorini Conference "Systems medicine and personalised health & therapy" - "The odyssey from hope to practice"

The 9th Conference aims to answer:

Can genetic screening help identify individuals at greatest risk for cardio-metabolic diseases and cancer?

What is the greatest clinical need with regard to diagnosis, prediction and patient stratification for these pathologies and how this is/can be addressed?

Does a genetic risk score identify patients at highest risk and is its use justified in clinical practice?

What are the challenges of the current clinical trials?

What about comorbidities with aging?

What is the impact of pharmacogenomics on:

Deliverance of more predictable responses to drug therapy

Minimisation of the occurrence and severity of adverse drug reactions

Conduction of more cost-effective clinical trials

Drug discovery and the drug development process

Do the existing diagnostic tools answer the needs of pharmacogenomics?
